produced and certified according to EN 1130
patent pending worldwide

USER'S INSTRUCTIONS CUNA RIMBAU

Congratulations on the purchase of this very special baby bed. It has been designed by the famous Catalanian architect and artist Miquel Rimbau from Girona. It is unique, not only in design, but also in its functions and in the careful choice of natural materials

TO ERECT

Take the bed out of the carton, and lay it on the floor. Release the fastening by turning toggle A1 and pushing it through the two cords B1. (Fig. 1)

Lift up the frame C1 slightly so that the bed opens. Now pull the height-adjusting frame A2 slightly upwards and towards you, as shown in in Fig.2. You have the choice of two positions.

POSITION 1:

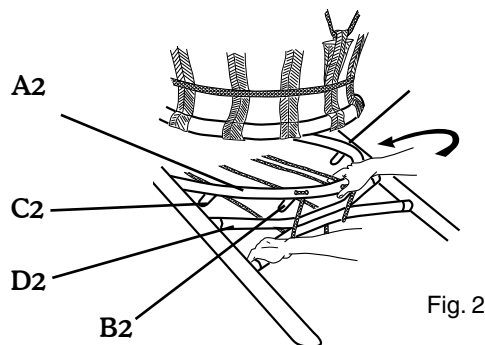

Low position.

Slot the teeth for the lower position B2 behind the crossbar D2 (Fig. 2)

POSITION 2:

High position.

Slot the teeth for the higher position C2 behind the crossbar D2 (Fig. 2)

USER'S INSTRUCTIONS CUNA RIMBAU

TO FIX THE POSITION

After putting the bed in the required position, it must be secured. Push toggle A3 under the crossbar B3 and thread it through the two cords C3 (Fig 3.1, Fig 3.2)

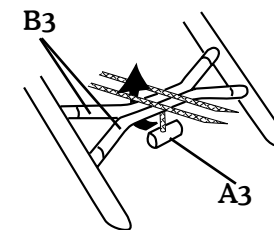

Fig. 3.1

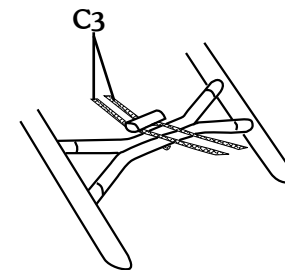

Fig. 3.2

CRADLE MOVEMENT

The Cuna Rimbau Baby Bed has a longitudinal rocking movement, very similar to the mother's arms. To block this movement, push up the wedges A4 on both sides, as in Fig 4.1. To release, push the wedges downwards. (Fig. 4.2)

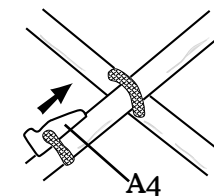

Fig. 4.1

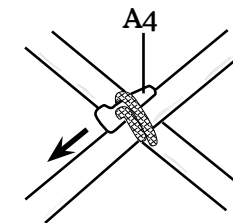

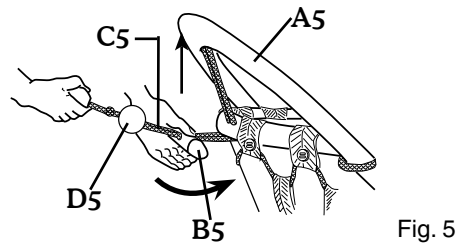

Fig. 4.2

TO ADJUST THE ANGLE

The angle of the base of the Cuna Rimbau Baby Bed is easy to change. For newborn babies particularly, doctors recommend positioning the head slightly higher after feeding.

To increase the angle of the bed, pull up the frame A5 slightly and push the toggle B5 along the cord C5 until the required angle is reached (Fig. 5). To secure the position also push up the knob D5

TO REMOVE AND WASH THE TEXTILES

Take the cushion and mattress out of the bed. Unbutton the inside cover and remove. Then take out the bed base A6, as shown in Fig 6.1. Loosen the cords B6, which can be found in a small bag C6 (Fig. 6.2) and unthread the cover textiles. They can now be completely removed. Please wash all the Cuna Rimbau bed textiles by hand, with cold water, using a washing agent for delicate fabrics.

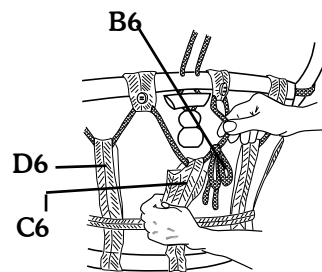

Fig. 6.2

FITTING THE CANOPY FOR DRAPES

Fit the holder for the drapes A7, as shown in Fig. 7.1 onto the frame B7 and secure it with the cords C7. Should you not want to use the drapes, you can simply turn the holder D7, and push it down. Fig. 7.2, Fig. 7.3.

	WARNING	
<p>Stop using the bed as soon as the baby can sit and begins to pull himself up. Don't leave anything in the bed which could cause stragulation or suffocation. Take care that older children only handle the bed when supervised by an adult. Do not use the bed if any part is damaged. Don't place the bed near to open fire or other heat sources, such as an electric heater or gas oven.</p>		

TO FOLD

Loosen the cords for adjusting the angle of the bed A8, Fig 8.1. Loosen the toggle securing the height adjustment B8 Fig. 8.2. Lift up the frame B8 until the height adjustment teeth are free Fig. 8.3. Fold the bed flat. Secure by threading the toggle D8 through the cords, as shown in Fig. 8.4. and turning. All the bed textiles are thus held together.
